Brazil Brilliance!

Christ The Redeemer is a man made masterpiece in Rio De Janeiro. Samuel B, a recent tourist to Brazil, said, "Let's be real, is it crowded, YES, absolutely, but it is worth the views and it really is great! Obviously the prices are going to be high so don't expect a bargain. It was a little under R\$200 for my wife, me and my baby boy to go up by train. It was fun and exciting. I think it's a great couples thing or for families with older children. It's complicated for babies, but they do their best to accommodate everyone. There's elevators and escalators all the way to the top." Enjoy an unreal train ride straight to the toe of the statue, take in the wonderful views from the mountains or gaze at the magical statue of Jesus. Christ The Redeemer is truly amazing.
